

MK 5 HD

Heavy Duty

This is a unique range of larger inflatable boats that are designed primarily to carry heavy loads at planing speed due to their trimaran FC hull shape equipped with lateral stabilizers.

Heavy Duty range boats use heavy materials and are reinforced throughout making them suitable for extreme service. Even at sizes up to 7 m, they can still be rolled up into a bag and thrown into the back of a pickup truck or aircraft.

Zodiac Milpro is proposing the MK 5 HD - MarkTM 5 Heavy Duty with a reinforced fabric, intercom valve system, large flow self-bailers and a sturdy long-shaft transom.
